

BLAST-OFF[®] FOAM CONCENTRATE CONCRETE REMOVER

Helps Keep Your Ready-Mix Fleet Looking and Working its Best!

No Mineral Acid • No Corrosion • No Damage

Blast-Off Foam Concentrate aggressively penetrates and softens hardened concrete buildup and splatter. This product is both user and environmentally-friendly and also safe to use on equipment and components!

Formulated with a natural, organic compound found in sugar cane and sugar beets, **Blast-Off Foam Concentrate** is a safe and effective alternative to mineral acid washing, sandblasting or the chip-and-hammer method of removing concrete buildup. Ideal for use on ready-mix trucks, batching equipment, bulk cement haulers and all types of concrete handling and finishing equipment.

- Will not corrode or damage steel, chrome, aluminum, paint, glass or plastic surfaces
- Contains NO mineral acids
- Will not corrode electrical components or wiring
- Safe for workers - will not burn skin or lungs and has minimal odor
- Safe for the environment - 100% biodegradable
- Once neutralized, can be safely rinsed into a sanitary sewer – contains a pH-sensitive dye that turns clear when neutralized
- Produces a thick, rich foam that clings well to vertical and overhead surfaces for effective removal of concrete buildup and splatter
- Economical - dilutes up to 1:6 with water
- Easily applied and diluted with the **Nox-Crete Perfect Power Foamer**

Available in 5 gal. pails, 55 gal. drums & 275 gal. totes

Turn 55 GALLONS into 275 GALLONS
with BLAST-OFF CONCENTRATE! *

* 1:4 dilution ratio

Dilution Ratio	275-Gal Tote Price
Undiluted	\$ per gal.
Diluted 1:2	\$ per gal. ÷ 3 = diluted cost
Diluted 1:3	\$ per gal. ÷ 4 = diluted cost
Diluted 1:4	\$ per gal. ÷ 5 = diluted cost
Diluted 1:5	\$ per gal. ÷ 6 = diluted cost

PERFECT PUMP FOAMER

Delivers thick, rich foam that maximizes the effectiveness of Blast-Off by extending dwell time, even on vertical surfaces

- Heavy-duty polypropylene tanks
- Viton® seals for extended durability
- Built-In pressure relief/safety valve
- Parts, service & technical support available direct from Nox-Crete

PERFECT POWER FOAMER

The Power Foamer consists of a water intake, pressurized air intake and two product intakes.

Water dilutes the products while the pressurized air quickly turns the product into a foam. Users can then apply the foam using the included wand.

ADVANTAGES:

- Heavy-duty design ideal for large equipment and trucks
- Includes air intake, water intake and two product intakes
- Easy-to-use wand included
- Produces a thick, rich foam

Special Offer

Order 2 drums or 1 tote of Blast-Off Foam Concentrate and receive a Power Foamer **FREE!** (\$1,300 Value)*

* One per customer location

DEACTIVATOR

PREVENT CONCRETE BUILDUP

Deactivator is the original chemically-active concrete equipment cleaning compound and maintenance coating. When applied before each use, Deactivator chemically reacts with the alkalis in concrete to instantly prevent fresh concrete from bonding and gradually softens existing concrete buildup.

- Forms a waterproof film on metal surfaces that will not wash off
- Stops new concrete from hardening against treated surfaces
- Chemically reacts with old concrete buildup to break it down and facilitate removal
- Will not harm rubber hoses or paint

EXCELLENT FOR USE ON THE FOLLOWING MACHINERY...AND MORE!

- Curb Machines • Slip Form Machines • Pumps • Screeds • Saws • Hoist Buckets
- Pipe Rings • Mixers • Paving Machines • Hoppers & Buckets • Mixers • Conveyors
