

ADD SOME **COLOR** TO YOUR SEALER!

# Chroma-Tint

COLOR ENHANCEMENT ADDITIVE FOR NOX-CRETE  
SOLVENT-BASED DECORATIVE SEALERS

## TINT SELECTION GUIDE

nox-crete®

chemical solutions to concrete problems

## Advantages of Chroma-Tint

- Brightens and enhances the color of both integrally colored and shake-on color hardened concrete
- Restores old or faded decorative concrete to its original vibrant appearance
- Quickly and easily transforms plain gray colored concrete into beautiful decorative concrete
- Chroma-Tint color additives can be used on most types of horizontal, exterior concrete surfaces
- Contains a specialized blend of non-fading, inorganic pigments, resins and surfactants designed to provide long lasting color uniformity to all types of exterior decorative concrete

# Nox-Crete offers **14** standard tints for a variety of color combinations to enhance your decorative space.

Nox-Crete's Chroma-Tint offers the ability to add color directly into the sealer, hiding imperfections or unevenness on most types of exterior concrete for a brighter, more uniform and vibrant look. Chroma-Tint is especially effective at restoring the original appearance to old, faded or worn decorative concrete surfaces. Combining Chroma-Tint with Nox-Crete's Sparkl-Seal or Cure & Seal 1315 A is a cost-effective solution to create a more inviting space with a professionally finished appearance.

## Ideal Uses For Chroma-Tint
